TOGETHER WE CAN BUILD A BETTER, GREENER & COMPASSIONATE SOCIETY

ORGANIZATIONAL OVERVIEW

Green Ahom Federation (GAF) is a registered Section 8 non-profit organization established with the objective of creating sustainable social development among marginalized and underprivileged communities across Assam, particularly in the Barak Valley region comprising Cachar, Hailakandi, and Karimganj districts. The organization has consistently worked in areas such as disaster management, education, skill development, health awareness, environmental protection, women empowerment, child rights, food security, livelihood development, and humanitarian relief services.

The financial year 2022–23 represented an important phase of expansion and grassroots intervention for Green Ahom Federation. During the year, the organization intensified its field-based activities focusing on vulnerable populations affected by poverty, flood disasters, unemployment, environmental degradation, food insecurity, and lack of awareness regarding social and legal rights.

The organization adopted a participatory development approach, emphasizing direct community involvement, local volunteer engagement, and collaboration with educational institutions, social workers, and community leaders to ensure sustainable impact.

MESSAGE FROM THE FOUNDER

The year 2022–23 was both challenging and transformative for Green Ahom Federation. The socio-economic condition of vulnerable communities in Barak Valley continued to be affected by recurring floods, unemployment, inflation, environmental degradation, and lack of access to essential awareness and welfare services.

In response to these challenges, Green Ahom Federation strengthened its commitment toward humanitarian service and community development. Through collective efforts of volunteers, supporters, donors, and local communities, the organization successfully implemented several impactful initiatives including flood relief distribution, environmental campaigns, child rights awareness programmes, livelihood-oriented training sessions, health support activities, and animal welfare interventions.

Our organization firmly believes that sustainable social development can only be achieved when communities are empowered with knowledge, resources, participation, and opportunities. Every activity undertaken during this financial year reflected our dedication toward building a socially responsible, environmentally conscious, and compassionate society.

We sincerely thank all volunteers, educational institutions, healthcare workers, social activists, supporters, and local citizens who contributed toward the success of our initiatives.

Shamil E.R. Laskar
Founder Director
Green Ahom Federation

VISION

To create a sustainable, equitable, and socially responsible society where every individual, irrespective of economic or social background, can live with dignity, security, and equal opportunities.

MISSION

- To empower underprivileged communities through education, skill development, and awareness.
- To strengthen disaster preparedness and humanitarian response systems.
- To promote environmental conservation and sustainable living practices.
- To ensure food security and social protection for vulnerable populations.
- To advocate for child rights, women empowerment, and community health awareness.
- To encourage compassionate treatment and welfare of animals.

WORKING AREAS OF THE ORGANIZATION

During 2022–23, Green Ahom Federation actively operated in:

- Cachar District
- Hailakandi District
- Karimganj District
- Rural and Semi-Urban Areas of Barak Valley, Assam

The organization's interventions focused particularly on economically weaker sections, disaster-affected populations, women, children, unemployed youth, daily wage earners, and socially marginalized communities.

PROGRAMME IMPLEMENTATION & ANALYTICAL REPORT

1. Skill Training Class on Financial Literacy & Management

Venue:

ITI Srikona Campus, Silchar, Cachar District

Budget:

₹25,000/-

Programme Background

Financial illiteracy continues to remain one of the major barriers preventing economically weaker youth from achieving financial stability and sustainable livelihood opportunities. In rural and semi-urban regions of Barak Valley, a large section of students and unemployed youth lack practical knowledge regarding banking systems,

savings, financial planning, entrepreneurship, and digital financial tools.

Understanding this gap, Green Ahom Federation organized a Financial Literacy & Management Training Programme at ITI Srikona Campus, Silchar, targeting youth, students, and aspiring entrepreneurs.

Objectives

- To improve financial awareness among youth.

- To educate participants regarding savings and budgeting.
- To encourage responsible financial decision-making.
- To increase awareness regarding banking and digital transactions.
- To promote self-employment and entrepreneurship.

Key Activities Conducted

- Interactive training sessions on personal financial management.
 - Awareness regarding bank accounts, loans, and government schemes.
 - Demonstrations on digital banking and UPI systems.
 - Group discussions on entrepreneurship opportunities.
- Practical budgeting exercises for students and trainees.

Analytical Impact

The programme revealed that a majority of participating students had limited exposure to formal financial systems despite having access to mobile technology. Participants particularly benefited from practical demonstrations on digital transactions and financial planning.

The training contributed toward enhancing financial confidence among youth and encouraged many participants to consider entrepreneurship and self-employment opportunities instead of depending solely on conventional employment.

The programme also aligned with GAF's broader objective of youth empowerment through capacity building and livelihood-oriented interventions.

2. Flood Relief Dry Ration Distribution Programme

Areas Covered:

- Cachar
- Hailakandi
- Karimganj

Budget:

₹1,27,000/-

Background

The devastating floods that affected Assam during 2022 severely disrupted the socio-economic condition of thousands of families across Barak Valley. Large numbers of households were displaced, agricultural lands were damaged, transportation systems were disrupted, and food insecurity increased drastically.

In many flood-affected villages, daily wage earners and low-income families faced acute shortages of food and drinking water.

Recognizing the urgency of humanitarian intervention, Green Ahom Federation initiated emergency flood relief operations in severely affected regions.

Relief Materials Distributed

- Rice
- Dal
- Edible Oil
- Salt
- Biscuits
- Drinking Water
- Essential Dry Food Items

Operational Challenges

- Waterlogged roads and damaged transportation routes.
- Inaccessibility of remote villages.
- Continuous rainfall during relief operations.
- Shortage of local transport facilities.

Despite these challenges, volunteers successfully reached vulnerable communities through coordinated field efforts.

Analytical Assessment

The relief programme highlighted the recurring vulnerability of flood-prone communities in Barak Valley. Many beneficiaries depended entirely on external humanitarian support during the disaster period.

The initiative demonstrated the importance of community-based disaster response systems and local volunteer participation. The programme also strengthened GAF's disaster management network and increased community trust in grassroots humanitarian interventions.

3. Plantation Drive on World Environment Day

Budget:

₹56,000/-

Locations:

Various Schools and Educational Institutions Across Barak Valley

Background

Environmental degradation, deforestation, increasing pollution, and climate change continue to pose serious threats to ecological sustainability in Northeast India. Rapid urbanization and reduction of green cover have significantly impacted environmental balance in the region.

To address environmental awareness at the grassroots level, Green Ahom Federation organized plantation drives on the occasion of World Environment Day across multiple educational institutions.

Objectives

- To promote environmental awareness among students.
- To encourage community participation in afforestation.
- To increase green cover in educational institutions.
- To inspire environmentally responsible behaviour among youth.

Programme Activities

- Plantation of fruit-bearing and medicinal saplings.
- Environmental awareness sessions in schools.
- Student-led eco-awareness campaigns.
- Distribution of awareness materials on environmental conservation.

Analytical Impact

The plantation programme successfully mobilized students, teachers, volunteers, and local citizens toward environmental responsibility. Educational institutions emerged as effective centres for spreading environmental awareness among younger generations.

The initiative also encouraged schools to adopt long-term plantation maintenance practices, ensuring sustainability beyond the event itself.

The programme contributed toward developing environmental consciousness and collective responsibility regarding climate protection and ecological conservation.

4. Awareness Campaign Against Child Labour

Budget:

₹35,700/-

Background

Child labour remains a critical socio-economic issue affecting vulnerable families in rural and economically weaker communities.

Poverty, lack of awareness, school dropout rates, and economic pressure often force children into labour activities instead of education.

Green Ahom Federation conducted awareness campaigns in schools and communities to educate children, parents, and guardians regarding child rights and the harmful consequences of child labour.

Activities Conducted

- School-based awareness sessions.
- Community meetings with parents and guardians.
- Child rights discussions.
- Distribution of awareness materials.
- Motivational counselling encouraging school continuation.

Key Discussion Areas

- Legal implications of child labour.
- Importance of education.
- Psychological and physical impacts of child labour.
- Government support systems for children.

Analytical Findings

The campaign identified economic hardship and lack of educational awareness as major contributors to child labour vulnerability in rural areas. Many parents were unaware of legal protections and welfare schemes available for children.

The programme significantly improved awareness regarding education rights and encouraged community dialogue around child protection and school retention.

5. Blood Donation Camp at Cachar Cancer Hospital

Background

Healthcare institutions frequently face shortages of blood units required for emergency treatment, surgeries, and cancer care. Patients undergoing cancer treatment often require urgent blood support, making voluntary blood donation extremely important.

To support healthcare services and promote social responsibility among youth, Green Ahom Federation organized a voluntary blood donation camp at Cachar Cancer Hospital.

Activities Conducted

- Blood donation awareness sessions.
- Volunteer mobilization campaigns.
- Health screening of donors.
- Coordination with healthcare professionals.

Analytical Impact

The programme encouraged active youth participation in humanitarian healthcare support. It also strengthened awareness regarding the importance of regular voluntary blood donation.

The camp demonstrated how community-driven healthcare initiatives can contribute toward strengthening emergency medical response systems in public institutions.

6. Animal Welfare & Rescue Activities

Budget:

₹15,000/-

Background

Stray animals in urban and rural areas often face neglect, starvation, accidents, abuse, and lack of medical care. During 2022–23, Green Ahom Federation intensified its animal welfare activities focusing on humane treatment and rescue interventions.

Key Activities

- Feeding stray dogs.
- Rescue of injured cows.
- Veterinary treatment support.
- Emergency animal care assistance.
- Community awareness regarding animal cruelty.

Analytical Impact

The programme generated positive community response toward compassionate treatment of animals. Local youth volunteers actively participated in feeding and rescue efforts.

The initiative also highlighted the need for structured animal welfare infrastructure and greater public awareness regarding humane practices.

The programme strengthened the organization's humanitarian outreach by integrating animal welfare within broader community development initiatives.

7. Dry Ration Distribution to Daily Wage Earners

Location:

Hailakandi District

Budget:

₹1,00,000/-

Background

Economic instability and irregular employment severely affected daily wage earners and low-income families during the financial year. Inflation and limited livelihood opportunities increased food insecurity among vulnerable households.

To support economically weaker communities, Green Ahom Federation organized dry ration distribution programmes in Hailakandi district.

Beneficiaries Included

- Daily wage labourers
- Rickshaw pullers
- Single-parent families
- Economically vulnerable households
- Informal sector workers

Relief Materials Distributed

- Rice
- Dal
- Oil
- Salt
- Basic food essentials

Analytical Impact

The programme helped reduce short-term food insecurity among vulnerable families and provided humanitarian support during financial distress.

The activity also created stronger engagement between local communities and the organization, encouraging future participation in social development programmes.

ORGANIZATIONAL ANALYSIS

The activities conducted during 2022–23 indicate that Green Ahom Federation has gradually evolved into a multi-sector grassroots organization focusing on both humanitarian relief and long-term community development.

Key Strengths Observed

- Strong volunteer participation.
- Effective grassroots connectivity.
- Ability to respond quickly during emergencies.
- Increasing public trust and community acceptance.
- Focus on inclusive development.

Key Challenges Faced

- Limited financial resources.
- Transportation barriers during disasters.
- Growing demand for relief support.
- Need for larger institutional partnerships.
- Lack of adequate infrastructure for expanding operations.

Strategic Observations

The year demonstrated that integrated community development requires simultaneous interventions in education, environment, disaster management, healthcare, livelihood, and social awareness.

Green Ahom Federation’s participatory approach enabled local communities to become active stakeholders rather than passive beneficiaries, which significantly improved programme effectiveness and sustainability.

FINANCIAL SUMMARY (2022–23)

Sl. No	Programme	Budget
1	Financial Literacy Training	₹25,000
2	Flood Relief Distribution	₹1,27,000
3	Plantation Drive	₹56,000
4	Child Labour Awareness	₹35,700
5	Animal Welfare Activities	₹15,000
6	Dry Ration Distribution	₹1,00,000

FUTURE ACTION PLAN

For the coming years, Green Ahom Federation aims to:

- Expand disaster response operations.
- Develop sustainable livelihood programmes.
- Strengthen youth skill development centres.
- Increase environmental conservation activities.
- Establish structured animal rescue initiatives.
- Promote educational awareness among vulnerable children.

- Collaborate with CSR and governmental institutions for larger-scale impact.

CONCLUSION

The financial year 2022–23 marked a significant period of humanitarian outreach and community engagement for Green Ahom Federation. Through its diverse interventions, the organization successfully addressed critical issues affecting vulnerable populations while promoting sustainability, awareness, dignity, and social responsibility.

The organization remains committed toward building an inclusive and resilient society through grassroots participation, humanitarian values, and sustainable development initiatives.
