

ANNUAL REPORT

Financial Year 2023–2024

Green Ahom Federation (GAF)

“Working Towards Sustainable Development, Human Dignity & Community Empowerment”

About the Organization

Introduction

Green Ahom Federation is a non-profit voluntary organization dedicated to social development, humanitarian assistance, public health promotion, women and child welfare, environmental sustainability, and community empowerment across Assam and the Barak Valley region.

During the Financial Year 2023–2024, the organization intensified its grassroots interventions in health, nutrition, food security, and humanitarian relief through collaborative initiatives with government departments, healthcare stakeholders, local communities, and corporate social responsibility (CSR) partners.

The organization continued to work among vulnerable and marginalized populations including tuberculosis patients, pregnant women, children, daily wage earners, elderly people, and economically weaker households. Through community-based outreach and participatory implementation methods, the organization successfully carried out multiple impactful welfare programmes across Cachar, Hailakandi, and Karimganj districts of Assam.

Vision

To build a healthy, equitable, sustainable, and empowered society where every individual has access to dignity, nutrition, healthcare, livelihood opportunities, and social justice.

Mission

- To support vulnerable communities through humanitarian and developmental interventions.
- To strengthen public health and nutrition awareness among marginalized populations.
- To promote community participation and social inclusion.
- To implement sustainable welfare programmes through partnerships and collaborative action.
- To improve the quality of life of disadvantaged populations through health, nutrition, education, and empowerment initiatives.

Message from the Director

The Financial Year 2023–2024 has been a year of dedicated service, compassion, and meaningful outreach for Green Ahom Federation. Our organization remained deeply committed to serving vulnerable populations across the Barak Valley region through targeted nutrition support, healthcare services, eye care interventions, and humanitarian assistance.

One of the major achievements of this year was the successful implementation of the Nutritional Food Packet Distribution Programme for 935 tuberculosis patients in Cachar and Hailakandi districts with the support of ONGC Silchar. This initiative significantly contributed toward improving nutritional support among economically disadvantaged TB patients, thereby supporting treatment adherence and recovery.

We also organized a large-scale eye screening and spectacle distribution programme in Hailakandi district benefitting around 500 individuals suffering from refractive errors and cataract-related complications. The intervention improved awareness regarding eye health and facilitated access to essential ophthalmic care services among rural communities.

In addition, the organization extended support to daily wage earners through dry ration distribution during Independence Day celebrations and implemented a maternal and child nutrition programme in the Luairpoa area of Karimganj district focusing on pregnant women and children below three years of age.

These achievements were possible because of the support of our donors, volunteers, health professionals, community workers, local stakeholders, and beneficiaries. We remain committed to continuing our efforts toward inclusive and sustainable community development.

Organizational Working Areas

- Public Health & Nutrition
- Tuberculosis Awareness & Patient Support
- Maternal & Child Welfare
- Eye Health & Preventive Healthcare
- Humanitarian Relief & Food Security
- Community Awareness Programmes
- Women & Child Development
- Rural Development & Community Empowerment

Major Activities Conducted During FY 2023–2024

1. Nutritional Food Packet Distribution to 935 TB Patients

Supported by ONGC Silchar

Budget: Rs. 14,85,000

Programme Background

Tuberculosis remains one of the major public health concerns among economically weaker communities. Poor nutritional status significantly affects treatment adherence, immunity levels, and recovery rates among TB patients. Understanding the urgent need for nutritional intervention, Green Ahom Federation implemented a comprehensive Nutritional Food Packet Distribution Programme for tuberculosis patients in Cachar and Hailakandi districts.

The programme was implemented with the valuable CSR support of Oil and Natural Gas Corporation (ONGC Silchar).

Objectives of the Programme

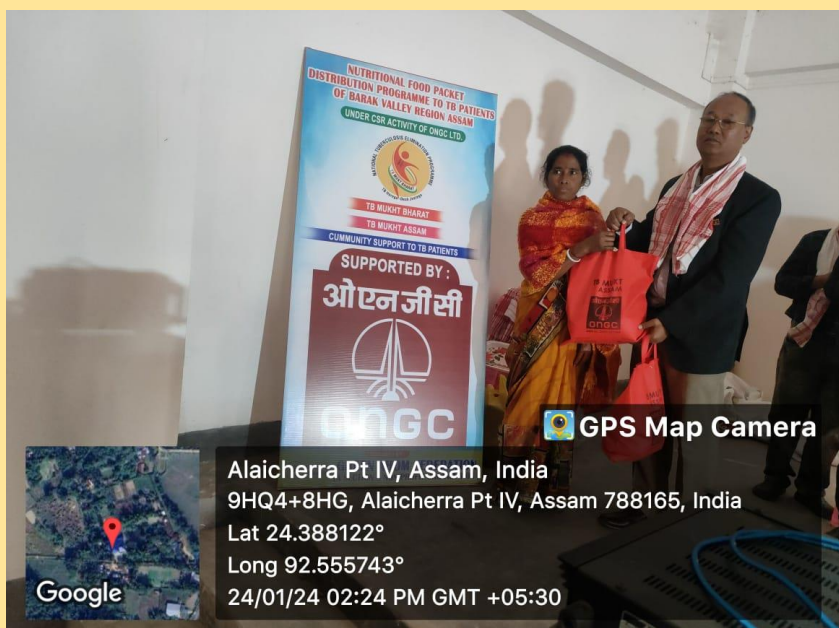

- To provide nutritional support to economically vulnerable TB patients.
- To improve immunity and treatment recovery among patients.
- To encourage regular treatment adherence.
- To reduce social vulnerability among affected families.
- To create awareness regarding nutrition and tuberculosis management.

Coverage Area

- Cachar District
- Hailakandi District

Beneficiaries

- 935 registered tuberculosis patients from economically weaker backgrounds.

Activities Conducted

Identification of Beneficiaries

Beneficiaries were identified in coordination with local health authorities, TB treatment centres, community health workers, and district-level healthcare officials.

Distribution of Nutritional Food Packets

Nutritious food packets containing essential dietary items such as pulses, protein-rich foods, edible oil, nutritional supplements, rice, soy products, and health-supportive consumables were distributed among the identified beneficiaries.

Health and Nutrition Awareness Sessions

Awareness sessions were conducted to educate patients and family members regarding:

- Importance of balanced nutrition during TB treatment.
- Hygiene and sanitation practices.
- Medication adherence.
- Prevention of disease transmission.
- Psychological and emotional support.

Community Outreach

Field volunteers and healthcare facilitators visited remote and vulnerable localities to ensure last-mile delivery and beneficiary support.

Programme Impact

- Improved nutritional intake among TB patients.
- Enhanced treatment compliance and patient morale.
- Reduced financial burden on vulnerable families.
- Increased awareness regarding tuberculosis management.
- Strengthened community-healthcare coordination.
- Encouraged social inclusion and reduction of stigma associated with TB.

Financial Utilization

Particulars	Amount (Rs.)
Nutritional Food Packet Procurement	12,80,000
Transportation & Logistics	78,000
Community Outreach & Volunteer Support	52,000
Awareness & Monitoring Activities	45,000
Administrative & Coordination Expenses	30,000
Total	14,85,000

2. Eye Camp, Spectacle Distribution & Cataract Identification Programme

Hailakandi District

Budget: Rs. 11,17,500

Programme Background

Access to affordable eye care remains limited in many rural and underserved areas of Assam. Poor vision, untreated refractive errors, and cataract-related complications often lead to reduced productivity, educational difficulties, and poor quality of life.

To address these challenges, Green Ahom Federation organized a comprehensive Eye Screening and Eye Care Support Programme in Hailakandi district.

Objectives

- To provide free eye screening services to vulnerable communities.
- To identify refractive errors and cataract cases.
- To distribute spectacles among needy individuals.
- To facilitate referrals for cataract surgeries.
- To promote awareness regarding eye health and preventive care.

Beneficiaries

- Approximately 500 individuals screened and supported.

Activities Conducted

Free Eye Screening Camp

A comprehensive eye examination camp was organized with the support of qualified ophthalmologists, optometrists, and healthcare volunteers.

Identification of Refractive Errors

Patients suffering from vision-related difficulties were screened and diagnosed for refractive errors.

Spectacle Distribution

Corrective spectacles were distributed free of cost among economically weaker individuals requiring visual support.

Cataract Identification & Referral

Cataract patients were identified and referred for further surgical management and treatment support.

Public Awareness Sessions

Community awareness sessions focused on:

- Eye hygiene
- Prevention of avoidable blindness
- Importance of regular eye check-ups
- Nutrition and eye health
- Early identification of cataract symptoms

Programme Impact

- Improved vision and quality of life among beneficiaries.
- Enhanced educational and occupational productivity.
- Increased awareness regarding preventive eye healthcare.
- Early detection of cataract and visual impairment cases.
- Strengthened healthcare accessibility in underserved rural communities.

Financial Utilization

Particulars	Amount (Rs.)
Eye Screening Camp Arrangements	2,75,000
Spectacle Procurement & Distribution	4,10,000
Cataract Diagnostic & Referral Support	2,25,000
Medical Team & Volunteer Support	1,12,500
Awareness & Logistics	95,000
Total	11,17,500

3. Dry Ration Distribution to Daily Wage Earners

Independence Day Humanitarian Support Programme

Budget: Rs. 65,000

Programme Background

Daily wage earners and low-income households often face food insecurity and livelihood instability due to irregular employment opportunities and rising living costs. On the occasion of Independence Day, Green Ahom Federation organized a humanitarian dry ration distribution programme to support vulnerable workers and their families.

Objectives

- To support economically weaker daily wage earners.
- To reduce temporary food insecurity among vulnerable households.
- To promote community solidarity and humanitarian values.

Activities Conducted

- Identification of needy beneficiaries through community networks.
- Distribution of dry ration kits containing rice, pulses, edible oil, salt, sugar, and essential food items.
- Community interaction and awareness regarding social welfare support services.

Beneficiaries

- Daily wage earners and low-income families from vulnerable communities.

Programme Impact

- Immediate food relief support provided to needy households.

- Reduced short-term food insecurity.
- Encouraged social participation and community support mechanisms.
- Strengthened trust between community members and civil society organizations.

Financial Utilization

Particulars	Amount (Rs.)
Procurement of Dry Ration Materials	52,000
Packaging & Transportation	8,000
Volunteer & Distribution Support	5,000
Total	65,000

4. Nutritional Food Packet Distribution for Pregnant Women & Children Below 3 Years

Lualaba Area, Karimganj District

Budget: Rs. 10,47,900

Programme Background

Maternal and child malnutrition continues to be a major developmental concern in rural and economically weaker regions. Pregnant women and young children require adequate nutrition to ensure healthy growth, safe pregnancy outcomes, and improved immunity.

To address nutritional deficiencies among vulnerable families of 1200, Green Ahom Federation implemented a targeted nutrition support programme in the Lualaba area of Karimganj district.

Objectives

- To improve maternal and child nutrition.
- To reduce risks associated with malnutrition among children below three years.
- To support healthy pregnancy outcomes.
- To raise awareness regarding maternal healthcare and child nutrition practices.

Beneficiaries

- Pregnant women
- Lactating mothers
- Children below three years of age

Activities Conducted

Distribution of Nutritional Food Packets

Special nutrition kits containing protein-rich and child-supportive food materials were distributed among beneficiaries.

Awareness Sessions

Health educators conducted sessions on:

- Balanced diet during pregnancy
- Infant feeding practices
- Child nutrition
- Breastfeeding awareness
- Hygiene and sanitation
- Immunization importance

Community Health Engagement

Volunteers and health facilitators interacted with local families to encourage long-term nutrition awareness and healthcare utilization.

Programme Impact

- Improved nutritional access among pregnant women and children of 1200.
- Enhanced awareness regarding maternal and child healthcare.
- Reduction in vulnerability associated with nutritional deficiencies.
- Improved community participation in health and nutrition programmes.
- Strengthened local awareness regarding early childhood development.

Financial Utilization

Particulars	Amount (Rs.)
Nutritional Packet Procurement	8,95,000
Transportation & Distribution	72,900
Awareness & Community Outreach	45,000
Volunteer & Monitoring Support	35,000
Total	10,47,900

Overall Programme Achievements FY 2023–2024

Programme	Beneficiaries
TB Nutritional Support Programme	935 TB Patients
Eye Camp & Vision Support Programme	500 Individuals
Dry Ration Distribution	50 Multiple Vulnerable Families
Maternal & Child Nutrition Programme	1200Pregnant Women & Young Children

Community Impact Summary

During FY 2023–2024, Green Ahom Federation successfully reached vulnerable populations across multiple districts through integrated health and nutrition interventions. The programmes collectively contributed toward:

- Improved public health awareness.
- Enhanced access to nutrition support.
- Better healthcare outreach in rural areas.
- Reduced social and economic vulnerability.
- Increased community participation in welfare programmes.
- Strengthened humanitarian support systems.

The organization’s interventions directly improved the lives of marginalized individuals and demonstrated the importance of community-centered development approaches.

Acknowledgement

Green Ahom Federation expresses sincere gratitude to:

- CSR partners and supporters
- Healthcare professionals
- Volunteers and field workers
- Local administration and community leaders
- Beneficiaries and community members

Special appreciation is extended to Oil and Natural Gas Corporation (ONGC Silchar) for supporting community health and nutrition initiatives through CSR collaboration.

Conclusion

The Financial Year 2023–2024 marked another important chapter in the journey of Green Ahom Federation toward building healthier, stronger, and more resilient communities. Through dedicated service delivery, grassroots engagement, and humanitarian action, the organization remained committed to addressing critical social and health challenges among vulnerable populations.

The organization looks forward to expanding its impact through sustainable partnerships, inclusive development programmes, and continued service to humanity in the years ahead.
